Forecast for Saturday 16 Nov 2024

Weather: Rain and drizzle at times today, especially this afternoon. Generally cloudy and quite dull throughout. Cloud and rain will clear south early this evening with clear spells then developing. A fresher feel will be noticeable with the change to northwesterly winds.

Chance of cloud-free hill tops above 600m: 30% rising to 80% later.

Low cloud and visibility: Layers of broken cloud above 400m will lift by late afternoon. Visibility will be rather hazy and sometimes poor throughout today, with only near-by hills visible below the cloud.

Forecast for Sunday 17 Nov 2024

Weather: A dry and bright start to the day with some early sunshine after a dry overnight period. Cloud will thicken in the afternoon as an area of rain moves in from the west through the evening, turning heavy at times and bringing hill fog. There will be a noticeable windchill throughout.

Maximum wind: Westerly 15-20mph gust 30mph.

Chance of cloud-free hill tops 600m: 90% falling to 30% through the evening.

Low cloud and visibility: Patchy cloud above 500m can be expected during the morning but most tops clear. Cloud will thicken and lower through the morning with layers above 500m developing through the evening. Visibility will be very good during the morning but turning hazier through the day, decreasing moderate or poor with the rain and hill fog.

Temperature: **Valleys:** Plus 3 rising to 9 Celsius.
At 600m: Plus 3 rising to 5 Celsius.
Freezing level: above all summits.
